

Luke Channings

is a Freelance Developer based in London

Skills

- Verging on 10 years of professional experience creating all sorts of things for the web;
- A deep understanding of the Frontend toolchain — I've built component libraries, codemods, and more custom Webpack configurations than I care to count.
- I keep up-to-date on new and upcoming web platform features, have a knowledge of browser support, and I do progressive enhancement by default.
- I'm aware that not everyone uses the web the same way, and I care about keeping the web accessible for everyone.
- I can even write maintainable CSS without a preprocessor!

Availability

I am available for new contracts in **February, 2022**
